Title Datasets for Teaching Archaeology and Paleontology

Version 1.0.0

Maintainer Nicolas Frerebeau

<nicolas.frerebeau@u-bordeaux-montaigne.fr>

Description Datasets for teaching quantitative approaches and modeling in archaeology and paleontology. This package provides several types of data related to broad topics (cultural evolution, radiocarbon dating, paleoenvironments, etc.), which can be used to illustrate statistical methods in the classroom (multivariate data analysis, compositional data analysis, diversity measurement, etc.).

arnold1949	<i>Arnold and Libby's Curve of Knowns</i>
------------	-------------------------------------------

Description

"The agreement between prediction and observation is seen to be satisfactory."

Usage

arnold1949

Format

A data frame with 6 observations and 8 variables:

sample Sample name.

age_expected Expected age (year BP).

age_expected_error Error on age_expected (year BP).

age_found Measured age (year BP).

age_found_error Error on age_found (year BP).

activity_expected Expected specific activity (cpm/g of carbon).

activity_found Measured specific activity (cpm/g of carbon).

activity_found_error Error on activity_found (cpm/g of carbon).

boves

Boves Ceramics

Description

A dataset containing the ceramic counts from the castle site of Boves (Somme, France). The data are grouped into eight periods ranging from the 10th to the 18th century and thirteen ceramic types.

Usage

boves

Format

A data frame with 8 rows and 13 variables (ceramic types):

compiègne

Compiègne Ceramics

Description

A dataset containing the ceramic counts from the Place des Hallettes in Compiègne (Oise, France). The data are grouped into five periods of about a century, ranging from the 9th to the 14th century, and sixteen ceramic types.

Usage

compiègne

Format

A data frame with 5 rows (chronological periods, numbered from the oldest to the most recent from 1 to 5) and 16 variables (ceramic types):

- A** Red to white ceramics with fine sized inclusions.
- B** Red to white ceramics with medium sized inclusions.
- C** Dark ceramics with fine sized inclusions.
- D** Dark ceramics with medium sized inclusions.
- E** Ceramics close to those of groups B or D, with similarities to group F.
- F** Black, red or beige ceramics with coarse inclusions.
- G** Red polished ceramics with fine to medium sized inclusions.
- H** Black polished ceramics with fine sized inclusions.
- I** Black polished ceramics with medium sized inclusions.
- J** Polished and painted ceramics with fine to medium sized inclusions.
- K** Painted ceramics, similar to those of group A.
- L** Painted ceramics, similar to those of group B.
- M** Painted ceramics with coarse inclusions.
- N** Glazed ceramics.
- O** Stamped ceramics.
- P** Coated ceramics.

epica2008

EPICA Dome C

Description

EPICA Dome C 800-ka composite CO_2 data.

Usage

epica2008

Format

A data frame with 2 variables:

age Year BP.

CO2 CO_2 (ppmv).

law2006

Law Dome Ice Core

Description

Law Dome Ice Core 2000-year CH_4 , CO_2 and N_2O data.

Usage

law2006

Format

A data frame with 2004 observations and 8 variables:

year Year AD.

NOAA04 NOAA04 CH_4 scale.

CH4_spl CH_4 spline (ppb).

CH4_grw CH_4 growth Rate (ppb/yr).

CO2_spl CO_2 spline (ppb).

CO2_grw CO_2 growth Rate (ppb/yr).

N2O_spl N_2O spline (ppb).

N2O_grw N_2O growth Rate (ppb/yr).

lisiecki2005

Global Benthic $\delta^{18}O$ Stack

Description

A global Pliocene-Pleistocene benthic $\delta^{18}O$ stack.

Usage

```
lisiecki2005
```

Format

A data frame with 3 variables:

age Calendar (calibrated) age (kilo year).

delta Benthic $\delta^{18}O$ (per mil).

error Standard error (per mil).

Details

The LR04 stack spans 5.3 Myr and is an average of 57 globally distributed benthic $\delta^{18}O$ records (which measure global ice volume and deep ocean temperature) collected from the scientific literature.

)
```

merzbach

Merzbach Ceramics

Description

A dataset containing the ceramic counts from the Merzbach assemblage (Germany). The data are grouped into eight phases.

Usage

merzbach

Format

A data frame with 8 rows (phases, numbered from VII to XIV) and 36 variables (pottery motifs).

```

spratt2016

Late Pleistocene Sea Level Stack

Description

A Late Pleistocene sea level stack based on marine sediment core data (foraminiferal carbonate $\delta^{18}O$).

Usage

spratt2016

Format

A data frame with 9 variables:

age_calkaBP Age (calendar kilo year BP).

SeaLev_shortPC1 Sea Level (meters above present day), climate reconstructions (scaled first principal component of seven sea level reconstructions (0-430 ka)).

SeaLev_shortPC1_err_sig Sea Level standard deviation from bootstrap (meters), climate reconstructions (scaled first principal component of seven sea level reconstructions (0-430 ka)).

SeaLev_shortPC1_err_lo Sea Level 95% confidence interval lower bound (meters), climate reconstructions (scaled first principal component of seven sea level reconstructions (0-430 ka)).

SeaLev_shortPC1_err_up Sea Level 95% confidence interval upper bound (meters), climate reconstructions (scaled first principal component of seven sea level reconstructions (0-430 ka)).

SeaLev_longPC1 Sea Level (meters above present day), climate reconstructions (scaled first principal component of five sea level reconstructions (0-798 ka)).

SeaLev_longPC1_err_sig Sea Level standard deviation from bootstrap (meters), climate reconstructions (scaled first principal component of five sea level reconstructions (0-798 ka)).

SeaLev_longPC1_err_lo Sea Level 95% confidence interval lower bound (meters), climate reconstructions (scaled first principal component of five sea level reconstructions (0-798 ka)).

SeaLev_longPC1_err_up Sea Level 95% confidence interval upper bound (meters), climate reconstructions (scaled first principal component of five sea level reconstructions (0-798 ka)).

 zuni

Zuni Ceramics

Description

A dataset containing ceramic counts from the Zuni region of the American Southwest.

Usage

```
zuni
```

Format

A data frame with 420 rows (assemblages) and 18 variables (ceramic types). The numbers in brackets correspond to the date range of each type (in AD years):

LINO Lino Gray (575-875).

KIAT Kiatuthlanna Black-on-white (850-910).

RED Red Mesa Black-on-white (900-1030).

GALL Gallup Black-on-white (1025-1150).

ESC Escavada Black-on-white (1050-1150).

PUBW Puerco Black-on-white (1050-1200).
